Profile

Computer Science graduate (Al Akhawayn University, 2026) with full-stack and backend experience across web, cloud and embedded systems. Delivered production automation in an enterprise setting, a business process rebuilt end to end for a 90 % reduction in processing time, alongside REST API design, relational and document data modelling, and containerised deployment with Docker and Kubernetes. Autonomous, comfortable in Agile teams and in code review.

Professional Experience

Software Engineer Intern **June 2025 to Aug. 2025**
Intelcia Solutions *Rabat, Morocco*

- Automated a manual business process end to end in Python (collection, extraction, transformation, reconciliation against source portals), cutting processing time from **2h30 to 15 min**, a **90 % reduction**, and returning over **10 hours** of manual handling per week to the business teams.
- Architected the application as decoupled services (orchestration, extraction, processing, verification) running **10 concurrent workers**, with YAML configurable targets onboarding a new portal at **zero code change**, plus integrity checks and structured logging that brought silent failures to **zero**.

Web Applications Intern **June 2024 to Aug. 2024**
ITS Elaraki School *Marrakech, Morocco*

- Built the "Preparia" exam preparation platform (WordPress, H5P), shipping **30+ interactive modules** across **6 baccalaureate subjects**.
- Ran documentation, functional support and end user training, onboarding **150+ students and 12 teachers** without follow up IT support.

Education

Al Akhawayn University in Ifrane, BSc in Computer Science (Minor: Communication Studies) **Sep. 2021 to July 2026**
Ifrane, Morocco

Boğaziçi University, Exchange program in Computer Engineering, *Istanbul, Turkey* **Fall 2024**

Technical Projects

eSaha: multilingual full-stack web application | React, TypeScript, Flask, MongoDB 2025

- End to end platform (React/TypeScript frontend, service structured Flask backend): JWT authentication, relational and document data modelling, dashboards and appointment booking, GPT API integration, interface localised in **4 languages**.

Mini Private Cloud: containerised platform | Python, Docker, Nginx, PostgreSQL 2026

- Python orchestration CLI driving the Docker Engine: declarative YAML provisioning, isolated container networking, persistent volumes, Nginx gateway, horizontal scaling, load balancing, monitoring and self healing services.

AneuXplain: explainable AI for medical imaging | Python, PyTorch, FastAPI, React 2026

- Full-stack system over a **2,000+ mesh** 3D pipeline: PyTorch model reaching **0.83 AUC**, exposed through a FastAPI REST API and consumed by an interactive React and Three.js 3D interface.

Technical Skills

Languages: Python, Java, C/C++, JavaScript, TypeScript, SQL, Kotlin, Dart, YAML
Frontend: React, Next.js, TypeScript, Vite, Tailwind CSS, Three.js, React Native, Flutter
Backend: FastAPI, Flask, Node.js/Express, REST API design, JWT authentication, SQLAlchemy, microservices, background workers
Databases: PostgreSQL, MySQL, MongoDB, schema modelling, query optimisation
Systems & DevOps: Linux, Docker, Kubernetes, Nginx, Git, CI/CD (Tekton), AWS, logging and monitoring, testing, Agile/Scrum, code review

Languages & Activities

Arabic: native **French:** bilingual **English:** professional **Spanish:** basic
Mentoring: mentor with the AUI Compete Organisation (algorithmic problem solving).
